

Before you start, make sure you have watched the North American Rhino on the Science page.

1. Go to www.irvmat.com
2. Click on **IMI Classroom**
3. Click on the **Science** tab
4. Choose **North American Rhino**

North American RHINO

How is teleoceras like a hippopotamus? How did scientist determine that teleoceras lived in the water?

The Indian Rhinoceros has one horn like teleoceras. Are there any other similarities? How is it different from teleoceras?

The African Black Rhinoceros has two horns, is much taller and does not live in the water. Do you think he is a descendant of teleoceras or a different species? Explain your answer.
